Overview

The present Learning and Teaching Package follows a holistic approach by providing background information and methodologies to foster the sustainable entrepreneurship competences of in-service and pre-service teachers. Based on the knowledge, skills and competences acquired by completing this LTP, teachers will be able to develop new teaching materials or adapt already existing ones with aspects of sustainable entrepreneurship education (SEE).

Entrepreneurship education plays a key role in supporting young people to adopt a positive mindset. The entrepreneurial mindset is referred to a certain way of thinking by which young people confront difficulties and problems in life. The entrepreneurial mindset enables young people to overcome those challenges, be decisive and take on responsibilities for any of their behaviours and activities.

The focus of Unit 1 is knowledge-basis around entrepreneurship and sustainability competences supported by focusing questions. Unit 1 materials are recommended for educators who are educating pre-service and/or inservice teachers. This unit aims to reflect on the level of the entrepreneurial mindset of the teachers in a creative and trustful atmosphere.

The aims of Unit 2 is self-reflection on values and attitudes towards sustainability and entrepreneurship. This unit raises the awareness of the teachers for fostering their own sustainable and entrepreneurship competences. Through different reflective phases teachers get aware of their motivation to work with these topics and also with the possibilities of interdisciplinary linking the theory (GreenComp, EntreComp) with the practice (own living and teaching environment).

The present Unit supports teachers by the transfer of their know-how, values, attitudes and motivation into the teaching practice. The key focus to get into action while elaborating ideas on how to connect the sustainable entrepreneurship approach with own teaching subject.

In Unit 4 the participants develop their own teaching and learning materials by aligning the learning objectives of their subject(s) with the sustainable entrepreneurship competencies. Furthermore, the participants also elaborate hands on working materials for students and set the assessment methods and tools for the assessment of the learning outcomes. There are examples provided.

Unit 5 is more practice-based, and would be of interest for student teachers and teachers to implement directly in the classroom. It aims to inspire to develop sustainable entrepreneurship competences among students in an engaging and fun way, while at the same time giving knowledge-basis around key concepts. Students will set on a journey to improve their local surroundings by critically exploring what could be improved and how in their own cities or towns.

Pedagogical Approach

The pedagogical approach bases on the <u>TAP-TS Roadmap</u> and aims to enable learners and teachers to think and act sustainably. The elaborated four units within the 7 Learning and Teaching Package (LTP) "Sustainable Entrepreneruship Education" include methodologies and tools to foster the active participation of the pre-servie and in-service teachers in the discourse on sustainabilty and follow a whole-school-appraoch when it comes to the transfer of the sustainable entrepreneurship approach into their own teaching. The five units furthermore follows a holistic approach while focusing on the competences defined in <u>the Green Comp Framework</u>.

This LTP incorporates activities which are focusing on real life challenges (Unit 1), action-oriented, hands-on and action-oriented (Unit 2, Unit 3, Unit 5) activities, and stimulate creative collaboration between the teachers (Unit 4). Unit 5 also invites teachers and student teachers who have tried out the materials to reflect on teacher practice at three levels and different dimensions (Follow-Up Activity2).

Sustainable Entrepreneurship Education: Background information

Sustainable entrepreneurship education teaches young people on the one side how to successfully use current resources to achieve sustainable growth while not risking future generations' ability to access resources. On the other side sustainable entrepreneurship competences enable young people to value sustainability; to support equity and justice for current and future generations; to approach a sustainability problem from all sides, to formulate current and potential challenges in order to identify sustainable approaches to anticipating and preventing problems, and to mitigating and adapting already existing problems. Furthermore, to adopt a relational way of thinking by exploring and linking different disciplines, using creativity and experimentation with novel ideas and methods and to act for change in collaboration with others round up the sustainability competences.

Piloting of the materials within TAP-TS

This LTP was piloted within the online Workshop in 2023 and one module was tested as a face-to-face workshop in November 2023 in Dresden. The online workshop is available on the <u>TAP-TS Platform</u>, and as text in <u>Appendix 1.</u>

UNIT DESCRIPTION

Start-Up

Pre- and in-service teachers put the aspects of entrepreneurship and sustainability in relation to each other and question the importance and meaningfulness of the competences for their own teaching. The teachers furthermore explicitly designate between disciplinary and interdisciplinary sustainable entrepreneurial competences in the curricula of the own teaching subject.

Estimated Duration

30 min

Activity 1.

Brainstorming

This activity focus on the repetition of the subject matter.

GreenComp Reference
1.1 Valuing sustainability

Preparation for Activities: You will need flipchart paper and pen.

Description

Before the following exercise starts the trainer shortly summarizes the main aspects of sustainability and entrepreneurship competences described in Unit 2.

Let's kick things off with a quick icebreaker: The participants pair up and discuss one sustainable business idea the participant is passionate about. The hypothetical business idea of the participant can reflect his/her hobby, his/her passion or anything else he/she likes to do. After shortly introducing the participants business idea to the peers - in not more than 60 seconds – the peers start to discuss what kind of competences would they need to make their business real. The participants make a short list and pin it on the wall. After introducing the business ideas and after discussing the required competences in peers, the trainer asks the participants to present shortly their findings on the variety of (sustainable entrepreneurship) competences to the plenum.

After the collection of ideas, the trainer shortly summarizes the findings and complement it with missing words/descriptors to best describe the phenomenon "sustainable entrepreneurship competences".

Development

The key aim of the activity is to get into action while elaborating ideas on how to connect the sustainable entrepreneurship approach with own teaching subject.

Duration

30 min

Estimated

Activity 2. Get into action.

The focus of this activity is on starting to think about the importance of sustainability and entrepreneurship for their own teaching.

GreenComp Reference
1.1 Valuing sustainability

Preparation for Activities: No special need for preparation.

Description

After mapping the aspects of sustainable entrepreneurship in the start-up phase, the participants work in groups and **list those competences which may be relevant for the own teaching subject**.

- Which of the concrete sustainable entrepreneurship competences elaborated throughout the first 2 Units does make sense in your teaching subjects? Which one not and why?
- Which of those competences do you already foster in your current teaching? Which one are new to you?

After collecting the answers each participant presents their findings.

An inspiration for connecting sustainable entrepreneurship with teaching can be this video by <u>EU</u>
<u>ScienceHub</u>

Consolidation

The key aim of the activity is to elaborate learning objectives related to their own teaching subject and the approach on sustainable entrepreneurship.

Estimated Duration

30 min

Activity 3. Elaborate learning outcomes

The focus of this activity is to have a collection of learning objectives which could have a potential for the implementation in the classroom teaching.

GreenComp Reference
1.1 Valuing sustainability

Preparation for Activities: No specific preparation is required.

Description

The participants write all sustainable entrepreneurship competences on a flipchart paper which they want to implement in their daily teaching. In addition, in the relation to the desired competences the participants **elaborate concrete objectives and learning outcomes.** For the elaboration of learning outcomes, the participants use the learning outcomes approach to make the learning outcomes transparent, assessable and comparable among the different participants/schools/countries.

Information on the learning outcomes approach are available here: URL:

CEDEFOP: https://www.cedefop.europa.eu/en/themes/learning-outcomes European Higher Education Area and Bologna Process: Writing and using learning outcomes: a practical guide. URL:

| Foll | ow- | Up |
|------|-----|----|
|------|-----|----|

The key aim of the activity is to present the objectives and learning outcomes related to the participants' own subject and to the topic on sustainable entrepreneurship to the other participants and get valuable feedback on its clarity and feasibility.

Activity 4. Follow-up

The focus of this activity is on getting feedback from the other participants on the elaborated objectives and learning outcomes.

GreenComp Reference 1.1 Valuing sustainability

Preparation for Activities: No specific preparation is needed.

Description

The objectives and learning outcomes are presented on the flipchart paper to the plenum. The other participants can reflect on:

- Are the learning outcomes clear?
- Are the learning outcomes understandable?
- Are the learning outcomes realistic?
- Are the learning outcomes comprehensible?
- Are the learning outcomes assessable?

Estimated

Duration

30 min

Glossary

Learning outcomes – are statements of what an individual should know, understand and/or be able to do at the end of a learning process, which are defined in terms of knowledge, skills and responsibility and autonomy.

Cedefop: Learning outcomes.

Sustainability - means prioritising the needs of all life forms and of the planet by ensuring that human activity does not exceed planetary boundaries.

GreenComp: Green Competence Framework

Entrepreneurship - is the capacity to act upon opportunities and ideas, and transform them into value for others. The value that is created can be financial, cultural or social.

EntreComp: Entrepreneurship Competence Framework

GreenComp - comprises four interrelated competence areas: 'embodying sustainability values', 'embracing complexity in sustainability', 'envisioning sustainable futures' and 'acting for sustainability'. Each area comprises three competences that are interlinked and equally important. GreenComp is designed to be a non-prescriptive reference for learning schemes fostering sustainability as a competence.

GreenComp: Green Competence Framework

EntreComp - is the European Entrepreneurship Competence Framework for people interested in learning, teaching and fostering the knowledge, skills and attitudes that make up an entrepreneurial mindset.

Appendix

Appendix 1 Online course concept

The online course is a one-week asynchronous course with a workload of about 1 hour per day. The concept bases on the above presented LTP. The content, the duration and the methodologies and tools have been adapted to the online format.

Overarching understanding goals

Over this one week you will:

- → explore best practices and strategies for teaching sustainable entrepreneurship.
- → engage with one another to spark innovative thinking and develop practical ideas for implementation.
- → apply ideas to your work by creating a usable product, such as a facilitation guide, or lesson plan.

Structure

This course is designed to offer overarching frameworks and ways of thinking, along with curated resources, that you then can apply to your own context. More specifically, this week you will find the following components:

- → an overview and specific learning objectives of each module.
- → a presentation of the course content (frameworks, models, etc.).
- → one discussion to collaboratively process the content of the course.
- → opportunities to give and receive peer feedback.

During the one-week course there is **one** live session at the end of the course. You are <u>welcome</u> to engage with the material at your own place. In order to reach the set learning objectives we recommend to complete the tasks day by day. However, if your learning style is different from this recommendation, please feel free to arrange your learning individually according to your needs and possibilities.

Unit 1 Entrepreneurship in Education

Learning objectives:

At the end of this course module you will be able to:

- describe the core idea behind the entrepreneurship education.
- list at least five competences related to the entrepreneurship education.
- to elaborate one practical example (case) with the reference to your own working field.

Unit 1.1 What is entrepreneurship education?

In the following module there are 16 learning videos available for you. It seems to be a lot, we agree! But each video lasts only for 2 - 3 Minutes and the speakers are very nice people. As the videos focus on the audio content, you can instead of watching too, only listen to them, for example by driving your car, sitting in the public transportation or by doing your weekly shopping. As the videos are practice oriented, we are sure you will enjoy it.

The following 15 videos give you a deeper insight into the particular entrepreneurship competences. You can start with any of the videos as all of the videos are standing alone videos.

Please remember: After watching all videos please reflect on your learnings and post your answers in the forum. Thank you.

Additional task: If you are interested in an additional task to strengthen your learning outcomes, please feel free to read our "Case study Inedible canteen food". The case study is available at the end of the course in a pdf document.

Unit 1.2 Case study "Inedible canteen food"

Dear Participants, if you are still motivated and interested in our course (we hope so (**)) we would like to provide you an additional task to deepen your expertise in the implementation of the Entrepreneurship Education in the practice. The Case study, Inedible canteen food" provides you an opportunity to apply your knowledge, skills and attitudes gained in this course on Entrepreneurship Education in practice.

How to work on this case?

- 1. Please read the case carefully.
- 2. Please follow the instructions in the document to start working on the case.
- 3. In this document YOUR perspective, ideas and visions are asked. In this way you have the chance to test the case by you, before you involve your students in this case.
- 4. Please feel free to fill in the document and send it to us, if you wish feedback from us. We would be glad to reflect together with you on your work.

If you have any question, please feel free to contact us.

nota bene: We also provide you a filled in document with some ideas (Document: <u>Solution approaches</u>). But please, only check this document after your tasks are done as it may impact your initial ideas.

Unit 2 Sustainability and Entrepreneurship Education

Dear Participant, after finishing your case study you are ready for our second module. In this module we will work on the topic "Sustainable Entrepreneurship Education.

Let's have a look together on the two terms "sustainability" and "entrepreneurship" and let's elaborate the synergies for the education.

Which competence are targeted when we speak about sustainability?

Education for Sustainablity

Sustainable meats Entrepreneurship Education

Unit 2.1 Case study "Sustainable canteen food"

Dear Participants, we would like to provide you a second case study which foster your expertise in the implementation of the approaches on the Sustainable Entrepreneurship Education in the practice. The case study "Sustainable canteen food" provides you an opportunity to apply your knowledge, skills and attitudes gained in this course on Sustainable *Entrepreneurship Education* in practice.

What does sustainable food means?
The case
Case study solution approaches

Unit 3 SEE in light of the "Whole school approach"

The two case studies in the previous chapters are good examples for showing options, how different approaches on Sustainable Entrepreneurship Education can be covered within the school curriculum. These kind of approaches can be embedded in small project related activities, depending on your resources and possibilities in your schools and organisations. But the topic on Sustainable Entrepreneurship Education can also be covered holistically based on the "Whole School Approach".

SEE in light of the "Whole school approach"

Unit 3.1 Implementation of Whole School Approach in project based work on SEE

In this module we will show you some ways for elaborating ideas for the project related work on "Sustainable Entrepreneurship Education" in your school or organizations.

The whole school approach in the practice
The five step investigation plan
The five step investigation plan in practice
Case study Whole School Approach with SEE template

Dear Participant, it's your turn. Please find attached the template for your work. You can use this template immediately in your classroom with students. But please feel free too, to work on this template first by you own and make first experiences without involving students in this work. You can send us your filled in template if you wish feedback from us. Thank you!

Unit 4 Recommendations for the implementation of SEE projects

Dear Participant, congratulations! You finished the pilot course on "Sustainable Entrepreneurship Education (SEE)". In the following document you will find some recommendations on how to develop a SEE-Project by focusing on the EntreComp and GreenComp framework. Thank you for your participation and support!

Recommendations for the implementation of SEE project in your institution

Appendix 2 TAP-TS Roadmap

TAP-TS Roadmap has three main goals: (1) for the TAP-TS partners as a roadmap to design LTPs; (2) for teachers and student teachers to design materials for teaching sustainability; (3) evaluation of LTPs. Explore the visualisation on the next page.

| TAP-TS Roadmap: the Ste | eps / stages in the TAP-TS LTPs Design Journey | | | | |
|---------------------------------------|--|--|--|--|--|
| 1: Clarify the Goal | Our overarching goal is to enable learners and teachers to think and act sustainably. To actively participate in the discourse on sustainability, the topics must also be addressed - sustainably - in schools and universities. The goal of TAP-TS is to create learning and teaching packages for this purpose in the following areas: 2.1 A Sustainable Europe. 2.2 Sustainability and Digitality. 2.3. Sustainability and Environmental Education. 2.4 Climate Crisis Resilience. 2.5 Dealing with Climate Disinformation. 2.6 Green Citizenship in/for Europe. 2.7 Sustainable Entrepreneurship Education. | | | | |
| 2: Competency Areas | The LTPS should be aligned with the interconnected four competences defined in the Green Comp Framework: • Embodying sustainability values • Embracing complexity in sustainability • Envisioning sustainable futures • Acting for sustainability | | | | |
| 3: Networking & Bundle Expertise | There are many exciting topics. 1. Find a focus: what driving question is at the centre of your LTP. 2. See what resources are available (competencies, teaching-learning materials, etc.). 3. Network with colleagues and partner institutions regionally and nationally. | | | | |
| 4: Working through the design process | Teaching Sustainability should be: action-oriented learning; hands-on; focussing on real life challenges; stimulate creative collaboration between teachers and learners; visions-oriented; participatory and action oriented. Approaches to teaching sustainability may be inquiry-based learning; explorative learning; networked learning; participation learning aimed at problem framing. Teaching Sustainability may incorporate the following activities: collaborative projects, future framing workshops, research and analysis, discussion. | | | | |
| 5: ASSESSMENT DESIGN | In Education for Sustainability assessment can be multifaceted and primarily encourage reflection and be evidence based. There is not always ONE right answer. The goal should be to RAISE QUESTIONS. TS is not about teaching the "right" behaviour, but about practising a critical perspective. Give TS an important place in curricula and implement credits, badges, or awards for it. | | | | |
| 6: PUBLISH TO TAP-TS PLATFORM | Can you and where can you publish your materials under a Creative Commons license as free as possible. Because that is sustainable! | | | | |

1 CLARIFY THE GOAL

A goal of TAP-TS is to create learning and teaching packages that would enable teachers and learners think and act sustainably. Find a focus based on SDGs, GreenComp Framework or a sustainability problem; and define learning objectives within the seven TAP-TS themes

- 1. A Sustainable Furone
- Sustainability and Digitality
- Sustainability and Environmental Educatio
 Climate Crisis Resilience. 5. Dealing
 with Climate Disinformation. 6. Green
 Citizenship in/for Europe. 7.
 Sustainable Entrepreneurship

PLAN

Consult the TAP-TS LTPs Architecture.
The LTPs Units should address the interconnected competences as defined e.g. in the Green Comp

- Embodying sustainability values
- 1.1 Valuing sustainability | 1.2 Supporting fairness
 - 2. Embracing complexity in sustainability
- 2.1 Systems thinking | 2.2 Critical thinking | 2.3 Problem framing
 - 3. Envisioning sustainable futures
- 3.1 Futures literacy | 3.2 Adaptability | 3.3 Exploratory thinkin
 - 4. Acting for sustainability
 - 4.1 Political agency | 4.2 Collective action 4.3 Individual initiative

See GreenComp for details

BUILD NETWORK AND GROW EXPERTISE

See what resources are available and could support your LTP

(teaching-learning materials, etc.).

Network with colleagues and partner institutions regionally and nationally. Describe possible collaborations with the 'world of work'.

ROADMAP
